Instructions: Replace the sample text in the text box with the questions you want to import. You can also set the default choice question format, open-ended question format and point value for questions. The questions text should conform to the following specifications.

- Each question should begin on a new line.
- The first line of each question should start with the question number followed by a period ('1.', '2.', '3.', etc.).
- If the question has choices the choices should immediately follow the question text.
- Each choice should be on a line by itself.
- Each choice should begin with a choice letter followed by a period ('A.', 'B.', 'C.', etc.).

The following **Optional Settings** may be added after the question and its choices. Each setting should be on a line by itself and follow the format **SettingName: SettingValue**. **Optional Settings will Override the Default settings**

- ANSWER: For choice questions enter the letter of each correct choice separated by commas. For open-ended questions enter the actual answer text.
- POINTS: The integer point value for the question. For Multiple Select questions this is the value of each correct choice.
- IMAGE: The URL of an image to display before the question text.
- FEEDBACK: Text to display after the user submits the quiz.
- TYPE: Identifies the specific question format to use.
MC = Multiple Choice, TF = True/False, MS = Multiple Select, SA = Short Answer, FB = Fill in the blank(s),
FM = Fill in the blank(s) shared answers, ES = Essay, OI = Off-line Item
****SA – Recommended Character width is between 100-200**** SA is used only for short one line
answer. Use ES for longer answers.
- ANSWERBOXES: Valid for Fill in the blank shared answers only, indicates the number of answer input boxes to display to the user.
