

# Angel-Hide a Course from Students

## How do I hide a course from students who are enrolled in that course?

**Description:** Courses have settings that will determine who has access to view the course. If the user does not have the correct level of permissions they will not be able to view the course. This is commonly done to prevent Students from seeing a course on their homepage prior to its start.

**Issue:** My course is not ready yet. Students will be enrolled in the course. Can I hide my course from the students? Can they login to the course but not access any content?

**Resolution:** Courses can be hidden from students by setting the course rights to editors only.

1. Search for the course to be hidden
2. Go to the Manage Tab > Under Access Settings > Change member access to editors only.

The screenshot shows the 'Access Settings' form with the following fields:

- Member Access:** A dropdown menu set to 'Editors Only'.
- Guest Access:** A dropdown menu set to 'None'.
- Search Engines:** Radio buttons for 'Yes' and 'No', with 'No' selected.

Below the radio buttons is the text: 'Show this course in 'Find a Course' searches?'

This will allow Course Editors to enter the course but not students.

- Go back to your Home Page
- Go to Course Section > Edit and Access your course
